

**CORDURA®**  
*UltraLite Fabric*

**SUPER LIGHT AND  
STRONG, BUILT  
FOR ADVENTURE**

# ULTRA LIGHTWEIGHT DURABILITY

## CORDURA® ULTRALITE FABRIC

Inspired by super lightweight, durable fabrics used in parachutes and hot air balloons. Ideal for applications where optimal strength-to-weight ratio is critical including technical packs, day packs, stuff sacks and pouches. CORDURA® *UltraLite Fabric* is woven with high tenacity nylon 6,6 filament yarns and offers an optimal strength-to-weight ratio.

### Characteristics

- Lightweight – less than 50 gm<sup>2</sup>
- Strong – excellent resistance to tearing
- Shiny Luster – 100% high tenacity (20D-40D) nylon 6,6 bright filament
- Water Repellent – finished, coated or laminated options

**Fabric type:** Woven, plain, rip-stop or dobby constructions. Coated, 2- or 3-ply laminates.

Ideal for use in technical packs, day packs, stuff sacks, pouches and accessories as well as performance apparel outerwear.

## CORDURA® ULTRALITE FABRIC
